Sen. Bradley applauds dental benefits for adults under Medicaid now law
SB 422 makes coverage available under state plan

CONCORD, NH – Majority Leader Jeb Bradley (R-Wolfeboro) issued the following statement today regarding SB 422:

“Now that SB 422 has been signed into law, adults in New Hampshire who are covered by the state’s Medicaid plan will be able to receive the oral health treatment they need. Getting this critical legislation passed was a top priority and I am delighted it received bi-partisan support. Good dental health is essential. It can affect a person’s overall health and the ability to maintain a job. Adults covered under this plan will also have less need for pain management, fewer surgeries, and brighter futures. The state will see lower health care costs and coverage will be paid for with a federal/state match. Today, we told our adults on Medicaid who are suffering from oral health issues that help is on the way.”
