Summary of testimony received:

Senator Sharon Carson, District 14 – prime sponsor

- Hearing opened at 11:40 am
- SB 144 follows on the heels of SB 93 which pass into law two years ago

- The bill extends the protection from zoning and regulatory changes for approved development projects that are stalled due to the poor economy.
- Understanding that the changes made in sections 2 and 3 have already been addressed in SB 38 and maybe a committee amendment can remove those sections.
- RSA 674:39 relates to two critical timeframes for developments:
 - The period of time during which you must actively begin a project
 - The deadline for substantially completing your project in order to earn vested rights against subsequent regulatory changes.

Michael Williams, NH Municipal Association

- The concern is in Section 1
 - Going back to the history of this it vests rights in anyone who has a planning board approval.
 - Gives them the right to built granted they meet two criteria:
 - Achieve active and substantial development in 12 months
 - They have substantial completion within 4 years.
 - A couple of years ago this was changed to accommodate the economical situation.
- The concern with the changes is that it puts a fixed date on when active and substantial development must occur.
 - If you look at the dates, if anything was approved in the year 2007 and they did not do active and substantial development that permit would have expired last year in 2010.
 - The new language says that it is active until July 1, 2012.
 - The question is are we reviving expired permits or is that not the intent?
 - I can see a legal argument in both directions.
 - There should be some clarification on how this is going to work.
 - A simple fix would be just to change the date from July 1, 2009 and change it to 2011 and still allow the 36 months for active and substantial.

Paul Morin, Homebuilders and Remodelers Association of NH

- In support
- Put in the dates expecting improvements which have not happened.
- Changing 2009-2011.
- Applications that have been approved but have not gone forward
- Line 4, chose to strike the 36 months for a couple of reasons
 - Planning boards don't have to track with a date specific.
 - If you leave in 36 months and your project was approved Jan 1, 2007 then you are getting no protection.
 - The intention is to carry those projects over and give them the opportunity to invest their projects.

Rene Pelletier, DES

- Support the changes in the latter part of the bill

- Not commenting on section 1, as the Department has no authority on that.

Hearing closed at 11:53 am

Funding: *Not applicable*

Future Action:

Senator Lambert made the motion that the bill ought to pass with amendment and the motion was seconded by Senator Bradley. The vote was 5-0 and Senator Lambert will take the bill to the floor.

Testimony

Sen. Carson

SUPPORT FOR SB 144 RELATIVE TO PROTECTION FROM ZONING CHANGES

SB 144 follows on the heels of SB 93 sponsored by Sen. Bragdon which passed into law 2 years ago. The bill extends the protection from zoning and regulatory changes for approved development projects that are stalled due to the poor economy.

RSA 674:39 relates to two critical timeframes for developments, the period of time during which you must actively begin a project and the deadline for substantially completing your project in order to earn vested rights against subsequent regulatory changes.

SB 144 addresses both of these timeframes by extending these periods of time only for projects approved within the timeframes stated in the bill.

The poor housing market and lack of available credit make it nearly impossible for projects that are approved or underway to gain these vested rights under the existing statutory timeframes.

SB 144 only targets projects that are currently trapped by the economic situation.

Specific questions on the timeframes in the bills and the dates can be directed to representatives of the Home Builders Association who requested this legislation.

RE: SB 144 relative to extending certain permits and approvals

Dear Senator Odell:

Thank you for the opportunity to comment on SB 144, which would extend certain permits and approvals for subdivision of land, fill and dredge of wetlands, and activities under the Comprehensive Shoreland Protection Act. The Department of Environmental Services (DES) has no position on Section 1 of this bill that proposes changes to RSA 674:39, V because it addresses local land use regulation and has no impact on DES programs. DES supports the other sections of the bill which amend RSA 482-A and RSA 483-B with one suggested clarification to ensure SB 144 can be effectively implemented by DES should the bill be enacted.

DES is not clear what is intended by the proposed language: "The project is proceeding towards completion ..." under XIV-a (c) and VI (c). We are concerned that this could be interpreted to mean either construction must continue through to project completion once started or that construction may stop and start again at the discretion of the permit holder so long as the conditions specified in the bill are met. DES requests that this language be clarified to ensure no future confusion if SB 144 is enacted.

Thank you for the opportunity to comment on this legislation. If you have any questions or need additional information, please do not hesitate to call Collis Adams at 271-4054 or me at 271-2958.

Sincerely,

Thomas S. Burack
