2021 SESSION

21-0206
10/06

HOUSE BILL **220**

AN ACT establishing medical freedom in immunizations.

SPONSORS: Rep. Lang, Belk. 4; Rep. Nunez, Hills. 37; Rep. Rouillard, Hills. 6; Rep. Pearl,
Merr. 26; Rep. Binford, Graf. 15; Rep. Harvey-Bolia, Belk. 4; Rep. Rice, Hills. 37;
Rep. Notter, Hills. 21; Rep. Bordes, Belk. 3; Rep. Pauer, Hills. 26; Sen. Avard, Dist
12

COMMITTEE: Health, Human Services and Elderly Affairs

ANALYSIS

This bill establishes the policy for medical freedom in immunizations for communicable diseases.

Explanation: Matter added to current law appears in ***bold italics***.
Matter removed from current law appears [~~in brackets and struckthrough.~~]
Matter which is either (a) all new or (b) repealed and reenacted appears in regular type.

STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty One

AN ACT establishing medical freedom in immunizations.

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 1 New Section; Communicable Disease; Medical Freedom. Amend RSA 141-C by inserting after
2 section 1 the following new section:

3 141-C:1-a. Medical Freedom.

4 I. Every person has the natural, essential, and inherent right to bodily integrity, free from
5 any threat or compulsion that the person accepts any medical intervention, including immunization.
6 No person may be compelled to receive an unwanted medical intervention, including immunization.

7 II. Paragraph I shall not:

8 (a) Limit the commissioner's authority to order treatment pursuant to RSA 141-C:15 or
9 RSA 141-C:18, nor to order quarantine pursuant to RSA 141-C:11 or RSA 141-C:18.

10 (b) Supersede the requirement for vaccination as a prerequisite for admission to a school
11 or child care agency pursuant to RSA 141-C:20-a II.

12 (c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27-
13 33; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of
14 patients compliant with RSA 135-C:57 III.

15 (d) Limit treatment authorized by a guardian over a person; or short term treatment of a
16 personal safety emergency declared by a licensed physician or nurse practitioner in a psychiatric
17 care setting, or authorized by a surrogate decision maker or durable power of attorney for health
18 care delegated by the person while competent to make decisions for them during periods when they
19 are not competent, pursuant to RSA 137-J.

20 III. Employers may only mandate medical treatment or immunization as a condition of
21 employment when a direct threat exists as defined in 29 CFR 1630.2(r). The department of
22 corrections may mandate medical treatment or immunization for inmates when a direct threat exists
23 as defined in 29 CFR 1630.2(r).

24 2 Effective Date. This act shall take effect 60 days after its passage.

05/27/2021 1595s

21-0206
10/06

STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty One

AN ACT relative to medical freedom in immunizations and establishing a committee to examine the policy of medical intervention including immunizations.

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 1 New Section: Communicable Disease: Medical Freedom in Immunizations. Amend RSA 141-C
2 by inserting after section 1 the following new section:

3 141-C:1-a Medical Freedom in Immunizations.

4 I. Every person has the natural, essential, and inherent right to bodily integrity, free from
5 any threat or compulsion by government to accept an immunization. Accordingly, no person may be
6 compelled to receive an immunization for COVID-19 in order to secure, receive, or access any public
7 facility, any public benefit, or any public service from the state of New Hampshire, or any political
8 subdivision thereof, including but not limited to counties, cities, towns, precincts, water districts,
9 school districts, school administrative units, or quasi-public entities.

10 II. Paragraph I shall not:

11 (a) Limit the commissioner's authority to order treatment pursuant to RSA 141-C:15 or
12 RSA 141-C:18, nor to order quarantine pursuant to RSA 141-C:11 or RSA 141-C:18.

13 (b) Supersede the requirement for vaccination as a prerequisite for admission to a school
14 or child care agency pursuant to RSA 141-C:20-a, II.

15 (c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27-
16 33; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of
17 patients compliant with RSA 135-C:57, III.

18 (d) Limit treatment authorized by a guardian over a person; or short term treatment of a
19 personal safety emergency declared by a licensed physician or nurse practitioner in a psychiatric
20 care setting, or authorized by a surrogate decision maker or durable power of attorney for health
21 care delegated by the person while competent to make decisions for them during periods when they
22 are not competent, pursuant to RSA 137-J.

23 (e) Apply to county nursing homes, the New Hampshire state hospital, or any other
24 medical facility or provider operated by the state of New Hampshire or any political subdivision
25 identified in paragraph I.

26 III. The department of corrections may mandate medical treatment or immunization for
27 inmates when a direct threat exists as defined in 28 CFR section 36.208.

28 2 Committee Established. There is established a committee to examine the policy of medical
29 intervention including immunizations..

1 I. The members of the committee shall be as follows:

2 (a) Two members of the senate, including one member of the minority party, appointed
3 by the president of the senate.

4 (b) Four members of the house of representatives, including 2 members of the minority
5 party, appointed by the speaker of the house of representatives.

6 II. Members of the committee shall receive mileage at the legislative rate when attending to
7 the duties of the committee.

8 III. The committee shall examine the policy of medical intervention including
9 immunizations..

10 IV. The members of the committee shall elect a chairperson from among the members. The
11 first meeting of the committee shall be called by the first-named senate member. The first meeting
12 of the committee shall be held within 45 days of the effective date of this section. Four members of
13 the committee shall constitute a quorum.

14 V. The committee shall report its findings and any recommendations for proposed legislation
15 to the president of the senate, the speaker of the house of representatives, the senate clerk, the
16 house clerk, the governor, and the state library on or before December 1, 2021.

17 3 Effective Date. This act shall take effect upon its passage.

CHAPTER 131
HB 220 - FINAL VERSION

7Apr2021... 0575h
05/27/2021 1595s

21-0206
10/06

STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty One

AN ACT relative to medical freedom in immunizations and establishing a committee to examine the policy of medical intervention including immunizations.

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 131:1 New Section: Communicable Disease: Medical Freedom in Immunizations. Amend RSA
2 141-C by inserting after section 1 the following new section:

3 141-C:1-a Medical Freedom in Immunizations.

4 I. Every person has the natural, essential, and inherent right to bodily integrity, free from
5 any threat or compulsion by government to accept an immunization. Accordingly, no person may be
6 compelled to receive an immunization for COVID-19 in order to secure, receive, or access any public
7 facility, any public benefit, or any public service from the state of New Hampshire, or any political
8 subdivision thereof, including but not limited to counties, cities, towns, precincts, water districts,
9 school districts, school administrative units, or quasi-public entities.

10 II. Paragraph I shall not:

11 (a) Limit the commissioner's authority to order treatment pursuant to RSA 141-C:15 or
12 RSA 141-C:18, nor to order quarantine pursuant to RSA 141-C:11 or RSA 141-C:18.

13 (b) Supersede the requirement for vaccination as a prerequisite for admission to a school
14 or child care agency pursuant to RSA 141-C:20-a, II.

15 (c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27-
16 33; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of
17 patients compliant with RSA 135-C:57, III.

18 (d) Limit treatment authorized by a guardian over a person; or short term treatment of a
19 personal safety emergency declared by a licensed physician or nurse practitioner in a psychiatric
20 care setting, or authorized by a surrogate decision maker or durable power of attorney for health
21 care delegated by the person while competent to make decisions for them during periods when they
22 are not competent, pursuant to RSA 137-J.

23 (e) Apply to county nursing homes, the New Hampshire state hospital, or any other
24 medical facility or provider operated by the state of New Hampshire or any political subdivision
25 identified in paragraph I.

26 III. The department of corrections may mandate medical treatment or immunization for
27 inmates when a direct threat exists as defined in 28 CFR section 36.208.

28 131:2 Committee Established. There is established a committee to examine the policy of
29 medical intervention including immunizations.

CHAPTER 131
HB 220 - FINAL VERSION
- Page 2 -

1 I. The members of the committee shall be as follows:

2 (a) Two members of the senate, including one member of the minority party, appointed
3 by the president of the senate.

4 (b) Four members of the house of representatives, including 2 members of the minority
5 party, appointed by the speaker of the house of representatives.

6 II. Members of the committee shall receive mileage at the legislative rate when attending to
7 the duties of the committee.

8 III. The committee shall examine the policy of medical intervention including
9 immunizations.

10 IV. The members of the committee shall elect a chairperson from among the members. The
11 first meeting of the committee shall be called by the first-named senate member. The first meeting
12 of the committee shall be held within 45 days of the effective date of this section. Four members of
13 the committee shall constitute a quorum.

14 V. The committee shall report its findings and any recommendations for proposed legislation
15 to the president of the senate, the speaker of the house of representatives, the senate clerk, the
16 house clerk, the governor, and the state library on or before December 1, 2021.

131:3 Effective Date. This act shall take effect upon its passage.

Approved: July 23, 2021
Effective Date: July 23, 2021

Amendments

Amendment to HB 220

1 Amend the title of the bill by replacing it with the following:

2

3 AN ACT relative to medical freedom in immunizations and establishing a committee to
4 examine the policy of medical intervention including immunizations.
5

6 Amend the bill by replacing all after the enacting clause with the following:

7

8 1 New Section: Communicable Disease: Medical Freedom, in Immunizations. Amend RSA 141-C
9 by inserting after section 1 the following new section:

10 141-C:1-a Medical Freedom in Immunizations.

11 I. Every person has the natural, essential, and inherent right to bodily integrity, free from
12 any threat or compulsion by government to accept any medical intervention, including
13 immunization. Accordingly, no person may be compelled to receive an immunization for COVID-19
14 in order to secure, receive, or access any public facility, any public benefit, or any public service from
15 the state of New Hampshire, or any political subdivision thereof, including but not limited to
16 counties, cities, towns, precincts, water districts, school districts, school administrative units, or
17 quasi-public entities.

18 II. Paragraph I shall not:

19 (a) Limit the commissioner's authority to order treatment pursuant to RSA 141-C:15 or
20 RSA 141-C:18, nor to order quarantine pursuant to RSA 141-C:11 or RSA 141-C:18.

21 (b) Supersede the requirement for vaccination as a prerequisite for admission to a school
22 or child-care agency pursuant to RSA 141-C:20-a, II.

23 (c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27-
24 33; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of
25 patients compliant with RSA 135-C:57, III.

26 (d) Limit treatment authorized by a guardian over a person; or short term treatment of a
27 personal safety emergency declared by a licensed physician or nurse practitioner in a psychiatric
28 care setting, or authorized by a surrogate decision maker or durable power of attorney for health
29 care delegated by the person while competent to make decisions for them during periods when they
30 are not competent, pursuant to RSA 137-J.

Amendment to HB 220

- Page 2 -

1 (e) Apply to county nursing homes, the New Hampshire state hospital, or any other
2 medical facility or provider operated by the state of New Hampshire or any political subdivision
3 identified in paragraph I.

4 III. The department of corrections may mandate medical treatment or immunization for
5 inmates when a direct threat exists as defined in 28 CFR section 36.208.

6 2 Committee Established. There is established a committee to examine the policy of medical
7 intervention including immunizations..

8 I. The members of the committee shall be as follows:

9 (a) Two members of the senate, including one member of the minority party, appointed
10 by the president of the senate.

11 (b) Four members of the house of representatives, including 2 members of the minority
12 party, appointed by the speaker of the house of representatives.

13 II. Members of the committee shall receive mileage at the legislative rate when attending to
14 the duties of the committee.

15 III. The committee shall examine the policy of medical intervention including
16 immunizations..

17 IV. The members of the committee shall elect a chairperson from among the members. The
18 first meeting of the committee shall be called by the first-named senate member. The first meeting
19 of the committee shall be held within 45 days of the effective date of this section. Four members of
20 the committee shall constitute a quorum.

21 V. The committee shall report its findings and any recommendations for proposed legislation
22 to the president of the senate, the speaker of the house of representatives, the senate clerk, the
23 house clerk, the governor, and the state library on or before December 1, 2021.

AMENDED ANALYSIS

This bill states the rights for medical freedom in COVID immunizations. The bill also establishes a committee to examine the policy of COVID immunizations.

UNAPPROVED

Amendment to HB 220

1 Amend the title of the bill by replacing it with the following:

2

3 AN ACT relative to advance directives for health care decisions.

4

5 Amend the bill by replacing all after the enacting clause with the following:

6

7 1 Advance Health Care Directives. Amend RSA 137-J:1-3 to read as follows:

8

137-J:1 Purpose and Policy.

9

I. The state of New Hampshire recognizes that ~~[a person has]~~ **individual persons have**
10 **the** ~~[a]~~ right, founded in the autonomy and sanctity of ~~[the]~~ **a** person, to control the decisions
11 relating to the rendering of ~~[his or her]~~ **their** own medical care. In order that the rights of persons
12 may be respected even after such persons lack the capacity to make health care decisions for
13 themselves, and to encourage communication between patients and their attending ~~[physicians, PAs,~~
14 ~~or APRNs]~~ **practitioners**, the general court declares that the laws of this state shall recognize the
15 right of a competent person to make a written directive:

16

(a) Delegating to an agent **in the durable power of attorney for health care** the
17 authority to make health care decisions on the person's behalf, in the event such person is unable to
18 make those decisions ~~[for himself or herself]~~ **independently**, either due to permanent or temporary
19 lack of capacity to make health care decisions;

20

(b) **Stating the person's wishes in the living will about end of life care and**
21 **providing guidance to the person's agent, surrogate, and/or** ~~[Instructing his or her]~~ attending
22 **practitioner** physician, PA, or APRN to provide, withhold, or withdraw life-sustaining treatment, in
23 the event such person is near death or is permanently unconscious].

24

II. All persons have a right to make health care decisions **and to refuse health care**
25 **treatments**, including the right to refuse cardiopulmonary resuscitation. It is the purpose of the
26 "Do Not Resuscitate" provisions of this chapter to ensure that the right of a person to self-
27 determination relating to cardiopulmonary resuscitation is protected, and to give direction to
28 emergency services personnel and other health care providers in regard to the performance of
29 cardiopulmonary resuscitation.

30

III. While all persons have a right to make a written directive, not all take advantage of that
31 right, and it is the purpose of the surrogacy provisions of this chapter to ensure that health care
32 decisions can be made in a timely manner by a person's next of kin or loved one without involving

Amendment to HB 220

1 Amend the title of the bill by replacing it with the following:

2

3 AN ACT relative to medical freedom in immunizations and establishing a committee to
4 examine the policy of medical intervention including immunizations.
5

6 Amend the bill by replacing all after the enacting clause with the following:

7

8 1 New Section: Communicable Disease: Medical Freedom in Immunizations. Amend RSA 141-C
9 by inserting after section 1 the following new section:

10 141-C:1-a Medical Freedom in Immunizations.

11 I. Every person has the natural, essential, and inherent right to bodily integrity, free from
12 any threat or compulsion by government to accept an immunization. Accordingly, no person may be
13 compelled to receive an immunization for COVID-19 in order to secure, receive, or access any public
14 facility, any public benefit, or any public service from the state of New Hampshire, or any political
15 subdivision thereof, including but not limited to counties, cities, towns, precincts, water districts,
16 school districts, school administrative units, or quasi-public entities.

17 II. Paragraph I shall not:

18 (a) Limit the commissioner's authority to order treatment pursuant to RSA 141-C:15 or
19 RSA 141-C:18, nor to order quarantine pursuant to RSA 141-C:11 or RSA 141-C:18.

20 (b) Supersede the requirement for vaccination as a prerequisite for admission to a school
21 or child care agency pursuant to RSA 141-C:20-a, II.

22 (c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27-
23 33; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of
24 patients compliant with RSA 135-C:57, III.

25 (d) Limit treatment authorized by a guardian over a person; or short term treatment of a
26 personal safety emergency declared by a licensed physician or nurse practitioner in a psychiatric
27 care setting, or authorized by a surrogate decision maker or durable power of attorney for health
28 care delegated by the person while competent to make decisions for them during periods when they
29 are not competent, pursuant to RSA 137-J.

30 (e) Apply to county nursing homes, the New Hampshire state hospital, or any other
31 medical facility or provider operated by the state of New Hampshire or any political subdivision
32 identified in paragraph I.

Amendment to HB 220

- Page 2 -

1 III. The department of corrections may mandate medical treatment or immunization for
2 inmates when a direct threat exists as defined in 28 CFR section 36.208.

3 2 Committee Established. There is established a committee to examine the policy of medical
4 intervention including immunizations..

5 I. The members of the committee shall be as follows:

6 (a) Two members of the senate, including one member of the minority party, appointed
7 by the president of the senate.

8 (b) Four members of the house of representatives, including 2 members of the minority
9 party, appointed by the speaker of the house of representatives.

10 II. Members of the committee shall receive mileage at the legislative rate when attending to
11 the duties of the committee.

12 III. The committee shall examine the policy of medical intervention including
13 immunizations..

14 IV. The members of the committee shall elect a chairperson from among the members. The
15 first meeting of the committee shall be called by the first-named senate member. The first meeting
16 of the committee shall be held within 45 days of the effective date of this section. Four members of
17 the committee shall constitute a quorum.

18 V. The committee shall report its findings and any recommendations for proposed legislation
19 to the president of the senate, the speaker of the house of representatives, the senate clerk, the
20 house clerk, the governor, and the state library on or before December 1, 2021.

HB 220, establishing medical freedom in immunizations.

Hearing Date: April 14, 2021

Time Opened: 10:21 a.m.

Time Closed: 12:27 p.m.

Members of the Committee Present: Senators Bradley, Gray, Avard, Sherman and Whitley

Members of the Committee Absent : None

Bill Analysis: This bill establishes the policy for medical freedom in immunizations for communicable diseases.

Who supports the bill: There are 506 names signed in support of this bill. To view the sign in sheet please contact the Legislative Aide to the Senate Health and Human Services Committee, Kirsten Koch, at kirsten.koch@leg.state.nh.us

Who opposes the bill: Dr. Christine Arsnow, NH Pediatric Society & NH Medical Society; Dr. Gary Sobelson, NH Medical Society; Beth Daly, NH DHHS; Neo Phoenix; Phyllis Nash; Patricia Anastasia; Courtney Tanner; Dorothy Ellis; Karen Testerman; Holly Atwell; Dede Walsh; Sandie Lee Brooks; Hridaya Sivalingam; Susan Bruce; Paula Minnehan, NH Hospital Association; Erik Shessler; Patricia Hess; Elizabeth Sargent, NH Society of Health-System Pharmacists; Richard Cohen, NH Pharmacist Association; Tejasinha Sivalingam; Alexandra Menella; Seana Ceplo; Natlie Brinely; Janet Lucas; Lucy Carter.

Who is neutral on the bill: Kenneth Norton, The National Alliance on Mental Illness (NAMI-NH).

Summary of Testimony Presented:

Representative Leah Cushman, Hillsborough 2

- Rep. Cushman introduced and testified in support of this bill.
- Rep. Cushman said, individuals have the right to treat their own bodies, and the right to accept or decline treatment without coercion.

- Rep. Cushman said, as amended by the House, there are exceptions to the bill:
 - This bill does not supersede school vaccination requirements.
 - There are some accommodation conditions for state law.
 - Under this bill involuntary submission of the mentally ill for treatment can still be done.
 - Vaccines for communicable diseases are still required.
- Rep. Cushman said, this bill requires due process for right to use. Patient self-determination is valuable. This bill declares that bodily autonomy is important. The government cannot mandate medical decisions.

Representative Tim Lang, Belknap 4

- Rep. Lang testified in support of this bill.
- Rep. Lang said he did not want to see this bill intervene with important procedures, for example, the life-saving work of first responders or required vaccinations for schools. This bill, as amended, is a good compromise.
- Rep. Lang said, this bill protects the inherit right to bodily integrity for the citizens of NH.
- Sen. Avard asked, can schools require parents at graduations to get vaccines to attend?
- Senator Avard referenced the UNH graduation.
 - Rep. Lang, my inclination is no. I serve on the Governor's re-opening task force. They have guidance available to them to safely host a large event.
- Sen. Bradley asked, would you have objection if we made this bill effective upon passage?
 - Rep. Lang did not have an objection.
- Sen. Avard asked, what is the penalty if someone violates this bill?
 - Rep. Lang said, I imagine it would be a civil penalty. We did not put one in here. I assume the Attorney General would decide that.
- Sen. Sherman asked, how does this address minors?
 - Rep. Lang, what does the section say?
- Sen. Sherman referenced Section 1 and said, suppose a child has a curable cancer and the recommendation is that they undergo standard chemo. The family wants to take the child elsewhere for different treatment. The state has a compelling obligation to protect the child. How does this bill protect the minor when there is a conflict with the parents and the medical providers?
 - Rep. Lang said, I would think federal law would override state law and there would be judicial intervention in that case.
- Sen. Sherman asked, would you be amenable to an amendment to protect a minor?
 - Rep. Lang said, I would not object to an amendment that clarifies that so long as it does not get into parental rights.
- Sen. Whitley asked, is this a problem in NH? Are there forced vaccinations?
 - Rep. Lang said, this bill came before the COVID-19 pandemic. If you want to be a foster parent, you and your family all must be vaccinated. Religious exemptions did not count there. You must be vaccinated. I believe that was an infringement on what could be perfectly good foster families.
- Sen. Avard said, would you be amenable to a fine for if someone violates this law?
 - Rep. Lang said yes.

- Sen. Bradley said, would you and members of the House be amenable to an amendment that made this for a person of the age of majority (18+ years old)?
 - Rep. Lang said, no, similar to Section 3, I would reference federal guidance in extreme cases. We do not want narrow guidance. I do not want it to infringe on parental rights.
- Sen. Sherman said, if you are a private commercial entity and you do not believe it is safe for people who are not vaccinated come onto your property, would your bill prevent a private entity from preventing an individual from participating on their property?
 - Rep. Lang said, that was provided for and there is a relevant United States Supreme Court case for that. This is about compelling individual rights. Customers have the right to shop and go where they want. I think there is a case to be made that individual business could make a requirement. I would not say that is a good idea.
- Sen. Sherman said, are we telling commercial businesses what to do with this bill?
 - Rep. Lang said, that is not what we are intending to do with this bill.
- Sen. Whitley said, this bill is a policy statement. This may interfere with federal law. Could we have the Attorney General weigh in?
 - Rep. Lang said, yes, I always welcome the Attorney General to weigh in. If there is a problem, let's fix it, but I do not believe this bill violates federal law.

Representative Lang later testified again at the end of the hearing.

- Rep. Lang said, this bill will not affect vaccination rates. This about protecting those that choose not to get vaccinated. Where there is a risk there needs to be a choice.
- Sen. Bradley asked, what if the Senate made this bill just about the COVID-19 vaccine and left all the other vaccines for another day?
 - Rep. Lang said, I believe in compromise. I will take what I can get, but we'll need to come back to it again and again.
- Sen. Whitley said, I remain perplexed on the need for this bill. We do not have a mandate, a passport, or etc. is this trying to solve a problem that doesn't exist?
 - Rep. Lang said, there is a national conversation going on about COVID-19 passports. This bill prevents those forward events. This also goes back to foster parents being required to get vaccines by the state. I see steps being taken that I do not like.

Dr. Peter McCullough

- Dr. McCullough said he is an expert in COVID-19 and works at the College of Medicine at Texas A&M.
- Dr. McCullough said, COVID-19 is a treatable illness early. COVID recovered patients have no risk of getting it again and cannot receive or transmit virus. Frail seniors, pregnant women, children were excluded from trials.
- Dr. McCullough said, currently we are pressuring individuals with safety at risk. COVID recovered patients have 2-3 times increased safety risks after vaccinated. Any individual felt pressured to get a vaccine would have to contemplate complex safety data.

- Dr. McCullough said, there have been 2,342 deaths in the 60 million COVID vaccinations, as well as hospitalizations and reactions. The vaccine failure rate is higher than we thought. It is immoral, unethical, and illegal to pressure individuals into vaccination.
- Sen. Sherman asked about Dr. McCullough's expertise.
 - Dr. McCullough said, I am considered to be a field expert. I am an epidemiologist.
- Sen. Sherman said, are you saying asymptomatic individuals cannot transmit the virus?
 - Dr. McCullough said, asymptomatic transmission is less than 1% of transmissions.
- Sen. Sherman asked, if you wouldn't mind providing the committee with those references it would be helpful. Wouldn't you agree if they are already forming antibodies that they are well along and not contagious?
 - Dr. McCullough said, we concluded the case contact did not transmit it. These are my opinions. They may not align with other doctors' opinions.

Beth Daly, Bureau Chief of Infection Control, NH DHHS

- Ms. Daly testified in opposition to this bill.
- Ms. Daly said, it is critical for certain immunization requirements remain in place to protect individuals.
- Ms. Daly said, we appreciate the amendments made in the house, but we still have some concerns. We are worried about inconsistent application throughout the state. We are primarily concerned about the bill for vaccinations for employees in health care facilities. If we eliminate the employee vaccination requirement, employee vaccinations will decrease, and this will put our most vulnerable patients in health facilities at risk.
- Sen. Whitley said, it sounds like federal law handles the delicate balance.
 - Ms. Daly said, we believe there already is a balance and there would be harmful impacts for this legislation.
- Sen. Avard said, if an employer forced me to get a vaccine, that gives the employer the right to jeopardize my health?
 - Ms. Daly said, we are talking about balancing perspectives here.
- Sen. Avard said, what are the potential risks for taking the vaccines? There are always health risks. These vaccine risks are not advertised on TV. Shouldn't I have the choice?
 - Ms. Daly said, the vaccines in use today are very safe.
- Sen. Avard said, over the long term will these vaccines cause any birth defects?
 - Ms. Daly said, the recommendation is for pregnant women to get vaccinated.
- Sen. Sherman said, we lead the country for vaccinations in senior facilities. What would be the impact if we were not to require or encourage vaccination for those who work in these facilities?
 - Ms. Daly said, once COVID-19 is introduced into one of these facilities it spreads rapidly.
- Sen. Sherman said, at the hospital I work at, during flu season, if you opt to not get vaccinated then you must wear a mask. Don't we already have protections for people that do not want to get vaccinated at their workplace?
 - Ms. Daly said, yes, usually wearing a mask.
- Sen. Bradley said, do you have a definition for a health care worker in statute we could use?

- Ms. Daly said, we use a definition from the CDC. It is quite broad from health services to food services and environmental services.
- Sen. Bradley said, if you could get that to us that would be helpful.
- Sen. Whitley said, isn't there a definition in NH statute?

Deana Pollard-Sacks, esq.

- Ms. Pollard-Sacks testified in support of this bill.
- Ms. Pollard-Sacks said her expertise is in liberty jurisprudence and constitutional law.
- Ms. Pollard-Sacks said, we already have signs for how medical liberty is viewed by the courts.
- Ms. Pollard-Sacks said, one issue I saw in the bill is when a state can order treatment of the child over the state. No person can be compelled to receive unwanted medical intervention. In the state's interest for a minor, there is a very clear rule for age 18+ that no medical treatment may ever be mandated. An individual has a right to die by their condition, but not by assisted suicide.
- Ms. Pollard-Sacks said, no liberty has ever been protected stronger than medical liberty. Additionally, private hospitals may end up having more protections than public hospitals.

Dr. Christine Arsnow, NH Pediatric Society & NH Medical Society

- Dr. Arsnow testified in opposition of this bill.
- Dr. Arsnow said, autonomy is important to an individual's health, but should not be preserved at the expense of another person. The vagueness of the wording in this bill is dangerous. This is a danger to vulnerable people. Foster families should be vaccinated to protect children in the government's care. This bill is not necessary to ensure medical freedom.
- Sen. Whitley said, isn't it true that vaccines are held to incredibly high standards?
 - Dr. Arsnow said, this is true. These vaccines are very well studied.
- Sen. Bradley said, all these COVID vaccines have been allowed on emergency FDA approval and have not been studied for decades.
 - Dr. Arsnow said, I was talking about routine childhood vaccines.

Representative Erica Layon, Rockingham 6

- Rep. Layon testified in support of this bill.
- Rep. Layon said her expertise on vaccines and medical supplies comes from her time on wall street.
- Rep. Layon said COVID-19 vaccines have not gone through the approval process and have not gone through rigorous study. The safety and efficacy of these vaccines does not have sufficient evidence. There is only an emergency use authorization. There are risks that a conscientious person can see. People can choose not to get this vaccine and that is a logical choice.

- Sen. Sherman said, I hope you mean instead of “logical choice,” you mean a “personal choice.” Where in statute right now is anyone compelled to get a COVID vaccine? Adults do have a right to refuse the vaccine.
 - Rep. Layon said, this is a clarifying issue that is emerging. We want to make sure people are not forced to choose between their livelihood and their health risks. I understand why a pregnant woman would think she is at risk, because pregnant women were not studied. This is especially a problem for women who have not yet disclosed to their employer that they are pregnant but may need an exemption from the vaccine because they are pregnant.
- Sen. Sherman asked, where currently is a woman, pregnant or not, required to be vaccinated?
 - Rep. Layon said, I am talking about where a woman could get that medical exemption.

Dr. Jay Bhattacharya, Professor of Medicine at Stanford University

- Dr. Bhattacharya said he has experience in infectious disease, immunology, and vaccine safety research with the FDA.
- Dr. Bhattacharya said he will only speak on the COVID-19 vaccine, which is the greatest invention in science.
- Dr. Bhattacharya said, vaccine passports and mandates undermine public health. These ideas create fear and hesitancy in the media. Skeptics are triggered by those who say you cannot live a normal life after the vaccine. We cannot create a two-tier society.
- Dr. Bhattacharya said, the risk of vaccine is asymmetrical. Comprehensive analysis concluded for individuals over age of 70, there is a 5% mortality rate and for individuals under the age of 70 there is a 0.5% risk of death from COVID-19.
- Dr. Bhattacharya reiterated some of Dr. McCullough’s testimony on asymptomatic spread.
- Sen. Whitley said, your testimony was about vaccine mandates and vaccine passports. Do you understand this bill does not do that?
 - Dr. Bhattacharya said, I understand this bill prevents that, but I am testifying the medical aspect of this bill.
- Sen. Avard said, do you think any part of Dr. McCullough’s testimony was misleading?
 - Dr. Bhattacharya said, I did not hear it all, but no.

Thomas Renz, esq.

- Mr. Renz said, in terms of individual liberties, since Roe v. Wade, there has been a very clear mandate that medical liberties trump everything else.
- Mr. Renz said, there has been over 379 deaths nationally for children. When the CDC issued the rule for death counting for COVID-19, it required COVID to be “the underlying cause more often than not.”
- Mr. Renz said, this bill prevents discrimination. Mr. Renz mentioned the story of Ryan White from the 1980’s. He said, aids had an almost 100% mortality rate. COVID does not.
- Mr. Renz said, why would we mandate a COVID vaccine? It is not even approved.

- Mr. Renz said, an employer that wants to discriminate against vaccination status is discriminatory on a religious basis.
- Mr. Renz said, I am against the COVID-19 vaccine. I am against no other vaccine.
- Mr. Renz said, we should not be mandating a vaccine where the mortality rate is so low. I urge you to expand this bill. Let's not allow for people to be discriminated against the same way they were in the 1980's for aids.

Lisa Dean

- Ms. Dean testified in support of the bill.
- Ms. Dean said, parental rights and consent is very serious.

Ken Norton, NAMI NH

- Mr. Norton said, this bill does is missing a section about nonemergency psychiatric health admissions. It should include this.
- Sen. Bradley said, please get back to us offline about that.

Randy Hebert

- Mr. Hebert said, this bill needs some language included.
- Mr. Hebert said, you guys need to do better.
- Mr. Hebert said he is in opposition of the bill at this time.

Dr. Lawrence Palevsky

- Dr. Palevsky said he is a pediatrician in New York.
- Dr. Palevsky said, unvaccinated children are blamed for outbreaks but cannot be vaccinated. Unvaccinated children are not necessarily responsible for outbreaks. There is an assumption that once you are vaccinated, then you do not spread the disease. This is not true. But we have ignored this.
- Dr. Palevsky said, 1 in 5 children have neurological disorders. 1 in 5 children have Autism. 1 in 20 children have seizure disorders. No study has ever evaluated neuro-inflammation from vaccines.
- Dr. Palevsky said, where there is risk, there needs to be choice. We are told to vaccinate with certainty, but there is a lot of uncertainty. We need the freedom to choose.

Dr. Gary Sobelson, NH Medical Society

- Dr. Sobelson testified in opposition to this bill.
- Dr. Sobelson said he is a family physician in NH.
- Dr. Sobelson said he is displeased with the amount of time spent on hearing testimony from out of state physicians during this hearing.

- Dr. Sobelson said, out of state physicians and attorneys previously testified information that contradicted national experts.
- Dr. Sobelson said, your privileges end when you incline on mine. You cannot harm others by your choice.
- Dr. Sobelson referenced the story of “Typhoid Mary.” He said she was an early immigrant who infected others and was eventually detained.
- Dr. Sobelson said, our state has done one of the best jobs in the country on leading vaccinations. Bills that get in the way of that are not in public interest.
- Sen. Bradley said, did you testify in front of the House?
 - Dr. Sobelson said, I did not.

Representative Judy Aron, Sullivan 7

- Rep. Aron testified in support of this bill.
- Rep. Aron said, we need to make sure people can make their own choice. People should not be bullied by society or government to do something they truly do not want to do.

Thomas McLeod, Mount Vernon, NH

- Mr. McLeod said he is the Liberty Defense Fund chair.
- Mr. McLeod said, Jacobson v. Massachusetts has been undermined by recent developments.
- Mr. McLeod said, nobody should be discriminated against for not taking the vaccine.
- Mr. McLeod said he plans to submit written testimony with further detail.

Laura Condon, Bedford, NH

- Ms. Condon testified in support of this bill.
- Ms. Condon said she is a National Vaccine Information Center volunteer.
- Ms. Condon said, there have been over 200 vaccine deaths reported. On January 4, 2021 there was a death in NH of a 44-year-old woman that got the COVID vaccine. On March 9, 2021 there was a death in NH caused from the Johnson and Johnson vaccine due to a blood disorder, such as a blood clot. This was 35 days before the Johnson and Johnson vaccine was paused.
- Ms. Condon said, the public is not getting accurate information from the public health department.
- Ms. Condon told an anecdotal story about a nurse who worked remotely from home and was fired for refusing the flu shot.
- Ms. Condon said, other treatment options should be promoted. COVID is not a death sentence. It is essential to protect medical choice.

John Schmitt

- Mr. Schmitt testified in support of this bill.
- Mr. Schmitt said, we need an even stronger bill to protect against vaccine passports.
- Mr. Schmitt said, the German theory of disease is wrong. Disease comes from poor nutrition. Some examples are scurvy and polio.

Subject: Please Support HB220

Dear Senators,

I am writing to ask you to support HB220. I am a registered pharmacist in the state of NH and I understand informed consent and medical freedom. NH's motto of "Live Free or Die" is in line with this bill. NH must establish medical freedom from any medical procedure, including immunizations.

I thank you for your support of HB220.

Warm regards,

Jenna Pedone
2200 Elm St, Manchester NH

Subject: HB220

Good morning.

Hope Monday is going well. Please know that I support HB220 establishing medical freedoms.

I feel it is very important you support this bill and get it passed this week. People's body autonomy is a God given right and not an arm of state or federal government.

Thank you,
Yvonne Askew

Subject: Please SUPPORT HB 220

Dear Honorable Senators,

I urge you to support HB 220. With other states rushing to mandate vaccine passports, and businesses and corporations pressuring their employees to vaccinate, this is an essential bill to guarantee the natural rights of NH citizens – the right to bodily autonomy.

Thank you,
Carolyn McKinney
Amherst, NH

Subject: Please support HB220 medical freedom

Dear Senators,

Please support HB220 and protect our medical freedom and privacy. No one should be forced to undergo a medical procedure or show proof of same to freely associate, travel, or engage in commerce. This is America, a land of freedom and opportunity, not some totalitarian nightmare where people are so afraid of a virus that we resort to demanding "papers please!" from what are supposed to be free citizens.

Sincerely,
Peter Buckley
Salem NH

Subject: HB 220

Kirsten Koch,

I am a life long resident of this small but great state of New Hampshire, currently residing in Manchester. I am writing to show my SUPPORT for HB 220.

1976 swine flu Immunization were pushed onto the public out of fear. The vaccine itself was associated with a paralyzing immune disorder called Guillain-Barré syndrome, which caused more deaths than the virus it was supposed to prevent.

1986 The **National Childhood Vaccine Injury Act was signed** and its purpose was to eliminate the potential financial liability of vaccine manufacturers due to vaccine injury or death.

Early therapeutics were lied about and censored. PCR testing has been inappropriately used. Vaccines companies have zero liability. World wide people are having reactions and/or death to this experimental vaccines. We have become the long term study; People cannot make informed consent when people are not being properly informed. Illegals are flooding our country untested, set free by our own government. Travel is already being restricted to citizens just like in communist China.

Governments and companies whether working together or separate to manipulate and force the public into unwanted vaccination are no better than communist and criminals. We are intelligent human beings and should be treated as such.

“There is no justification for taking away individuals freedoms in the guise of public safety”

Thank you for your time,
Cris Fellows

April 14, 2021

Honorable Senator Jeb Bradley
Senate Health and Human Services Committee
107 North Main Street
Concord, New Hampshire 03301

Dear Chairman Bradley and committee members,

My name is Kenneth Norton and I am the Executive Director of NAMI NH, the National Alliance on Mental Illness. I am a licensed Independent Clinical Social Worker in the State of New Hampshire with extensive experience in working in community mental health. I have served as a subject matter expert in the areas of mental health as well as suicide prevention for the US Substance Abuse and Mental Health Services Administration, the Department of Defense and the Veterans Administration. Closer to home I have served on numerous legislative committees and commissions. I have also served as a licensed foster parent and I have family members with mental illness as well as with co-occurring substance use disorders

NAMI NH takes no position in relation to the overall content of HB 220 with the exception of Section II (C) lines 12-14, which we currently oppose as written, as it neglects to address non emergency mental health admissions which are a key component of our mental health system of care.

Involuntary Emergency Admission petitions have a maximum stay of 10 days. The non emergency admissions are for anyone needing to be held for longer than 10 days as well as for other legal situations eg. people charged with certain crimes who have been found not competent to stand trial. These are the longer term commitments which are heard by probate court and can be for up to 5 years.

Our recommendation is that the bill be amended to include non emergency admissions under RSA 135-C 34-54. Suggested language is italicized below

(c) Supersede the involuntary emergency admission process pursuant to RSA 135-C:27- 33; the non emergency admission process under RSA 135-C:34-54; the revocation of conditional discharge process under RSA 135-C:51; or involuntary treatment of patients compliant with RSA 135-C:57 III.

Thank you for your consideration, please contact me if you have any questions:

Respectfully,

A handwritten signature in black ink, appearing to read "Kenneth Norton".

Kenneth Norton, LICSW
Executive Director

Sent: Monday, April 12, 2021 2:35 PM
To: Jeb Bradley; James Gray; Tom Sherman; Becky Whitley; Kevin Avard; Kirsten Koch
Subject: Hearing on HB 220

Please support HB 220 when it comes before your Committee for consideration on the 14th. Protecting the medical freedoms of New Hampshire's residents is extremely important.

My 78 year old mother is extremely fit and healthy. She still snow skis, water skis, plays pickle ball and rides horses. She walks her dog daily and eats a healthy diet. My mother got her annual flu shot and plans to get the Covid-19 vaccine. However, she wants to first learn more about the risks and side effects of the individual vaccines, and this will take some more time. She is making an educated decision that feels right to her. Her decision is not based on politics.

In the last month, my mother has encountered discrimination on a regular basis from family, friends and members of the community for her choice to wait to get vaccinated. I am disheartened that in the "Life Free or Die" state, this discriminatory mentality is gaining momentum.

I support House Bill 220 because it will protect the medical freedoms of New Hampshire residents, and prohibit discrimination. Please uphold our right to bodily integrity, free from any discrimination.

Kind regards,

Linda Van Arsdale

Dear Honorable Senators,

I urge you to support HB 220.

With other states rushing to mandate vaccine passports, and businesses and corporations pressuring their employees to vaccinate, this is an essential bill to guarantee the natural rights of NH citizens – the right to bodily autonomy.

Thank you,
Jennie Genus

Good Afternoon All!

Please support HB220: Establishing medical freedom in immunizations. Every American and Granite Stater should be able to choose if they want immunizations, vaccines, shots of any kind and at any time ... this is the epitome of personal health as well as medical liberty and freedom!

BR,

Brian Mazur

Subject: In support of house bill 220 - medical freedom in immunizations

I am writing in support of the medical freedom in immunizations. I am not against all vaccinations, however I am concerned with our methods and blurry lines of the government and the pharmaceutical industry. Unfortunately, there are no guarantees in life and as lay people we often need to follow those who have been educated or claim to be experts. As a child I was unwell. Every pharmaceutical sadly left me needing more and nothing worked. As a young adult, having enough and getting no where, I began searching holistic methods – these included chiropractic care, changing my diet, taking supplements and exercising more. My life turned around. My sick time at work was no longer needed or used. I was finally happy. This was because I had choices in the care of my health. Later I went on to help others and became a holistic health counselor. I began learning what was in medications to include vaccines. Things that are considered harmful to humans, especially humans with impaired immune systems or foods sensitivities. As a country we need to do better. And this includes not mandating vaccination, but coming together and accepting peoples choices but also educating from prevention and things we can do to better our health and improve our immune systems. This time has allowed me to speak to more people about the importance of self care to include better sleep habits and increasing their vitamin C intake. It is a start and people always need to be able to choose.

Thank you for your time and consideration,
Alicia Grimaldi

Subject: SUPPORT of HB 220

Dear Health and Human Services Committee Members,

In this time of grave concern, our human rights being under constant threat by powerful forces, our natural and most basic existence as humans, we must preserve ourselves the essential decision making and sovereignty over self and family. In this culture of medical corporatism that dominates all of us - with commercials, sponsorships, partnering and profiting, we must stop medical bullying. Each of us have different medical needs, not one like the other. Customized approaches are critical for individuals with autoimmune disease, cancers, allergies and diseases. From my own experience unfortunately, medical injury is real - from procedures to pharmaceuticals - where there is risk , we must have a choice.

I kindly ask you to represent my voice in support of HB 220. Thank you for working on these important bills that affect our daily living in New Hampshire.

Sincerely,
Jenn Dafeldecker

Subject: Please Support HB 220 - Establishing Medical Freedom in Immunizations!
Importance: High

Dear NH Senate Health and Human Services Committee,

I strongly urge you to please support HB 220 - Establishing Medical Freedom in Immunizations.

It is completely unacceptable for the government to force people to receive vaccinations against their will. This would be a blatant and appalling violation of our very bodily integrity and our basic human rights as Americans. Choosing to immunize is a personal decision that individuals should make for themselves based on their health status, risk level, and other factors.

Nor should the private sector be allowed to limit participation in society based on vaccination status. This is medical discrimination and also a violation of our human rights.

Please help keep New Hampshire a free state! Thank you!

Sincerely,
Julia Beame

Subject: HB220 Support

Dear Committee Members:

If ever there was a time, in history, when medical freedom should be overwhelmingly supported...it is now.

Government has no place in the medical decisions of citizens. Government has no right to insert themselves between a citizen and their health practitioner.

As products are repeatedly approved, sold, injure, recalled across our state who would ever think they would know better than the individual about what is right.

Medical freedom, informed consent, bodily integrity, are all basic human rights.

Support HB220 for without it, we are truly not free.

Respectfully,

Nicole Nordlund

Please pass HB220, but there is so much more the legislature needs to do to rectify what has occurred in the past year - please help:

These are the reasons I will not be taking the COVID shots:

First some local stats: the COVID experimental vaccine began distribution in mid to late December 2020. On Dec 31st, Cheshire County (population 76,000) had had 7 deaths-with-Covid for the 10 months of 2020. In 2021 there have been 25 more deaths with COVID, as of March 31, just three months, with the experimental vaccine program in gear.

The Keene Sentinel reported on three congregant care facilities - each had a vaccine clinic on December 30th. At Court St 12 died in the month following the vaccine clinic. Court Street had about 85 residents. The Winchester facility reportedly had only 1 case during the 10 months of 2020, but an outbreak shortly following its vaccine clinic, The Main Street facility was more complicated, people coming and going, but also had an outbreak shortly following its vaccine clinic.

Please note that the VAERS system lists vaccine injury (and death) but reports at more than a week after the injury, and is voluntary. Very few vaccine injuries are actually reported and logged into VAERS. I couldn't find any of the 12 deaths above in screening for New Hampshire and a 12/30/20 injection date, see. Also note that there is little available liability or recourse for vaccine injury.

The Nuremberg Code (see Wikipedia) has 10 precepts for medical experimentation on human subjects. The first two are:

ONE: The voluntary consent of the human subject is absolutely essential.

TWO: The experiment should be such as to yield fruitful results for the good of society, *unprocurable by other methods or means of study*, and not random and unnecessary in nature.

We are being bullied by mainstream media to take the shots. I hear it every day on local radio, also from Governor Sununu. This contradicts the first precept which is generally taken to mean informed consent without coercion.

Maybe you didn't know that by taking the experimental vaccine you were agreeing to be a lab rat in an experiment. Surely you understand that a vaccine developed in eight months could not have tested its effects even just a few years out. Maybe you didn't know that the FDA has not approved them. The FDA has merely given EUA, emergency use authorization, figuring it would do more good than harm. The FDA did break rule 2 above in that it eliminated alternative therapies that have been successful elsewhere, *making them unprocurable* in most states. See also the Pfizer document, especially pages 123 to 125 regarding the absence in testing for pregnant and lactating women and contraceptive guidance; also the catchall exclusions on pages 37 to 39. Also, please note the word "healthy" in the title. (the link to the Pfizer document has died; the best substitute I can find currently is here.)

Lori ShibiNette of NH DHHS signed an emergency order on April 3, 2020. This order separated patients, doctors, and pharmacists from life giving medications. This is a crime. The NH legislature should immediately cancel this order, cancel the State of Emergency, and relieve ShibiNette of her duties. ShibiNette's and the FDA's actions have violated principle 2 above.

In July 2020 Dr. Harvey Risch wrote [this](#) in Newsweek, explaining both the political situation and the life-saving remedy *available* to COVID patients before they become hospitalized. Other states began stocking the remedies. Then the FDA inhibited their use.

In Texas, it is still legal to effectively treat COVID patients before they are hospitalized. In testimony before a Texas Senate committee, Dr. Peter McCullough explains [here](#). Dr. McCullough believes Texans have acquired 80% herd immunity. He believes, as I do, that natural immunity is superior to what injections can produce. He also believes that 85% of COVID fatalities could have been saved with early effective treatment, treatment he gives day-to-day in his clinics.

The Keene Sentinel has published my prior letters regarding Toney Baloney (Fauci), Donald Trump, and Joe Biden. I believe these three to be exceptionally venal conmen. There is risk for anyone in taking their recommendations; they all agree we should be taking the injections. Have you noticed there is no talk about costs, or more importantly future costs? Bill Gates has already said a third injection may be called for. Pharma has told Wall Street that prices will be increasing. There is too much profit in contrived death, war, cigarettes.

When COVID began I sat next to Rabbi Loewenthal at the synagogue. She saw the opportunity that we all would join together to fight COVID. I said, no, it is Amalek. Amalek was the tribe that attacked the Children of Israel as they were escaping Egyptian slavery. Like COVID, Amalek attacked from the rear, the stragglers, the old, the disabled, the infirm, those who had difficulty keeping up (economically, today). Rabbi Loewenthal saw the good side, but I could only see the evil and injustice. That's why she was Rabbi and I could never be. I hope she is right.

Today, Passover, we celebrate freedom from Egypt. There was a dedication in the square Monday recognizing the initiation of Holocaust remembrance month. As I write, it is interesting that we can use the Nuremberg Code to guide us medically.

I could write much more on the various counter-productive frauds and deceptions (stay-at-home, lockdown, pcr test, Johns Hopkins inflated numbers in 2020, COVID with vs COVID because of, masking the healthy, masking children,...) that have occurred over the prior year. Gerhard Bedding, John-Michael Dumais, Johanna Laurie, and Becky Montrone have already done most of this in letters to the editor. Much more information can be found at [RiseupNH.org](#). The headline of Gerhard's July letter said it well... "Why are we simply accepting this take?"

Lastly, I would like to leave you with two more videos; Dr. Lee Merritt discusses the fix we are in, war 5.0 [here](#), please pay particular attention to her views on masking children. For a very deep dive into the virome and a hopeful future paradigm to replace our current medical system, see Dr. Zach Bush's 3-hour video What Happened Last Year [here](#). Dr. Bush's analysis is different from what we have been force fed, his risk factors for COVID are attached.

I believe I became part of the herd immunity in the spring of 2020. The number of medical people (like Dr. McCullough) who believes we have already reached a high herd percentage is growing.

I hope this explains why I will not be taking the injections, which, like almost all medical procedures, bear risk. I hope this piece supports those with nagging doubts who feel bullied, by giving them the informed choice to which they are entitled.

For those who have already taken the injections. I apologize that I couldn't get this out sooner - Dr. McCullough's testimony made the difference. I believe that you and those around you will be more at risk than me, because the injection is experimental in nature. My January [letter](#) outlines the disciplines I have been following to stay healthy.

I HAVE NO MEDICAL TRAINING.

Subject: Please support HB220

Honorable Senators,

I am writing today to urge you to support HB220, which would protect health freedom and make sure that "Every person has the natural, essential, and inherent right to bodily integrity, free from any threat or compulsion that the person accepts any medical intervention, including immunization." Please know that I do not support any limitations on this right (as amended in the bill), and do not feel any private business has the right to compel a vaccine, either.

Here are some issues related to the so-called COVID vaccines that are not well known:

1. According to the British Medical Journal *and the manufacturers themselves) unlike traditional vaccines, the COVID vaccines are not designed for nor have they been scientifically proven to a) prevent infection or b) stop viral transmission. (1, 2) They are only designed to "reduce symptoms." Many doctors and scientists have been shouting about this not being a vaccine at all (it isn't, by any standard definition) (3). I would urge you to learn more and consider using your power to help initiate a lawsuit on behalf of the citizens of NH when you do.
2. The COVID vaccines are not FDA-approved as they are still in trials. They are only "authorized" under Emergency Use Authorization, which has a low bar for safety and efficacy. Under US and international law, no one can be forced to take this "vaccine." And it is against the Nuremberg Code. People should be free to take it or not take it, without public pressure or -- given the dangers -- any encouragement.
3. Traditional vaccines take between 7 and 10 years to develop for a very good reason. There is no way in God's Green Earth that any of the pharmaceutical companies can predict the possible side effects from this novel treatment that has taken less than a year to bring on line. Already the US Vaccine Adverse Events Reporting System (VAERS) has tallied, in relation to the COVID vaccines, 2,249 deaths and over 50,000 injuries, including some that are irreversible (4). Worse, VAERS is a passive and voluntary system and is notorious for underreporting events. Both the government and the mainstream press are not publicizing these deaths and injuries, and are dismissing any possible correlation with the vaccine without due process (like an independent investigative body). It is absolutely Orwellian, Mr. Doyle, and those of us who are looking at all the data are frankly aghast at what is being pushed on an unsuspecting public.
4. Vaccines are notorious for stimulating viral shedding, which is the off-loading of viral particles in large quantities for a period of time after having been vaccinated. I personally would not want to be anywhere near a person who was just vaccinated.
5. COVID-19 is not the killer that it was originally advertised to be. Over 99.75% of people survive, and that's in an atmosphere where highly effective medicines like hydroxychloroquine and ivermectin (6) (both of which can be taken prophylactically) have been suppressed and clinicians using them are still being censored. Estimates are that as many as 80% or more of patients could have been saved with early treatment -- yet this was precisely the opposite from guidance offered by

the NIH and CDC. (5) Plus, given that most age groups are less susceptible to SARS-CoV-2 than to the flu, most do not need the vaccine, which as noted above carries greater risk than the virus itself.

6. Finally, the vaccine issue (with such things as vaccine passports under consideration) will quickly become a way to separate people -- from resources, jobs, opportunities, travel, you name it. We do not want a two-tiered society under any circumstances. Already around half of US adults have said they would not take the vaccination, including a large number of healthcare workers -- they've been reading the studies and reports as well.

Vaccines are not the answer. Good nutrition, Vitamins C and D (7), zinc, melatonin, glutathione and other nutrients have been shown to be highly effective for both prevention and treatment. And there are literally dozens of other treatments that are also extremely effective. Those at high risk from COVID may want to consider the vaccine and should have the freedom to do so, but that is not most people.

Thank you for listening.

Regards,

John-Michael Dumais
Keene

Re: HB220

Dear Respected Members of Congress,

What my life experience has taught me the most is that not one human or any group of people could ever begin to fathom what another person has gone through, both on an individual, familial, or group basis. Everyone has a reason for their choices, regarding why they feel that certain measures are what is best for their own individual health. Everyone responds differently to medications, vaccinations, and even to food. I support individuals each individual right to choose their own health care and if they do or do not want to be vaccinated. For me, I have valid reasons as to why my body would not respond well, as I am sure that others do as well.

After having a child I had a doctor tell me that the IUD Mirena would help me with awful and painful bladder and urinary symptoms that I had. I was diagnosed with Interstitial Cystitis. My immediate response was, "That does not sound good for me." The doctor nonetheless convinced me that it was harmless and would help me. I then became very sick from this IUD, as many other women did. I was ill when I had it and became gravely ill once it was taken out. It is giving a person synthetic progesterone so once it comes out the body it not making enough so my entire digestive system crashed. I also suddenly had mercury poisoning that was off the charts. No coincidence and even though I cannot prove it I know that the drug company has mercury in them. Mercury creates a greater chemical reaction and is a great preservative. It took me years to recover from these chemicals in my body and restore my health. You see, it is my belief that everyone has an innate knowing within them of what will and will not be good for them. Everyone does not follow it unfortunately. I knew that I should not get that IUD but I listened to my doctor instead.

I completely restored my health but not with chemicals, medications, or vaccinations. I no longer even have any symptoms of Interstitial Cystitis. I not only restored my health but became healthier and stronger than ever before. I did it by eating whole, organic foods. I have had proof within my own body that taking chemicals is not what makes us healthier, but the elimination of them.

I understand that you as the government, serving the people are concerned about the global health epidemic of COVID-19 and feel as though you need to do something to stop the progression of serious illness and death. But with all due respect, forcing people to take vaccinations or forcing them to do whatever else lies down the pike is not the answer. In my opinion, and I am sure that I am not alone, is stopping the production of factory farming and genetically modified organisms. If you want to know why COVID-19 is affecting people's immune systems so much that is the answer. There is only so long that the human race can handle all of these antibiotics, hormones, aspartame, and other dangerous genetically modified organisms in their food chain. The human race has a trashed immune system. How could they not when this is what they are eating.

It is pretty clear that during the COVID-19 pandemic that some individuals are asymptomatic, while others are minimally sick, and then there are those on the other end of the spectrum that are serious illness and death. Clearly this is due to their immune system and underlying conditions. I honestly mean no disrespect with my next few statements, but if you really want to do the work of helping the American people with disease, illness, COVID-19, etc. then these problems in the food chain is what will do that. I find it hard to believe that if I know all of this, that there are not at least some members of Congress that know this. But this is the hard work that will take a long time and feels too impossible because it has already gone so far down the line. If you really want to make a mark on history and help people and show that you care, it really does start here. If people are focused on money and getting re-elected, yes, you may have to worry less about your own finances, and the economy as a whole. But how can you feel good about yourself turning a blind eye to this. Happiness comes from within, from really knowing that you are doing the right thing for yourself and others. That would give more joy to you, knowing that you are doing the right thing. I invite those members of Congress who know a lot about factory farming and genetically modified organisms to have the opportunity to speak about it to the rest of Congress. It may look good on the money end but it is of great health risk to everyone and this is why people are getting so ill from COVID-19, not from the lack of vaccinations.

Right now more than ever is a time for unity. People on all sides are acting in dangerous and violent ways to try to show their anger, their point, their rights. What do you think forcing any time of health care, including vaccinations, is going to do those people acting in violent ways. I am not an angry or violent person and I oppose that behavior on all accounts. And if you were to pass mandatory vaccinations I would be super angry. So I can only imagine what these people who don't see anything wrong with this behavior would do.

In conclusion, I humbly ask you, respected members of Congress to please consider the letter that I have written, as well as the following concluding statements. It is really a pivotal time in history where great positive change could be made or disastrous control could explode an already fragile country. More control taken upon people is likely to explode things. I invite you all to dare to dream big about positive changes that can help everyone, including you. Climate change is no doubt affected by factory farming. It would be so amazing to change our climate while simultaneously changing our food chain. We could stop allowing drug companies to control our decisions and our health care. We could stop allowing chemical companies to control our food. This is what is making people so ill, not any illness that we are inflicted with. People who have never tried eating all organic and whole foods have no idea how amazing they feel and how much their health is restored. I have felt that inside me. I felt so ill all of the time and had no energy. I have not needed to go to a doctor in a decade, nor has my husband or child because this is how we eat. Some of you may feel like this has nothing to do with the topic of mandatory vaccinations of COVID-19 or other illness but I assure you that it does. It is this path that we have taken that has compromised the human immune system so gravely. You will feel amazing if we go down this path, as will other humans. The better people feel, the less violence and illness that arises. In the long run we will be saving money. Forcing vaccinations may appear to solve an immediate problem but it will compromise the immune system of people in the years to come because all chemicals and medications do that. We are not innately made to consume them. I invite you to take the brave path, that yes is more work and money in the long run but will benefit you and generations to come. We as individuals have the innate knowing within us to know if a vaccination is right for us or not. That inability to choose feels like

the opposite of freedom and feels like a violation of our 1st Amendment. Thank you for your time in reading my perspective on the subject.

Sincerely,

Erica Thibeault

NH Resident

Subject: Apr 12-Support HB220

Follow Up Flag: Follow up
Flag Status: Completed

Dear Kirsten,

I hope you are well and thank you for your efforts to help the citizens of NH.

What is 29 CFR 1630.2(r) ?

III. Employers may only mandate medical treatment or immunization as a condition of employment when a direct threat exists as defined in 29 CFR 1630.2(r).

I am especially supportive of HB220 because I have been making personal health choices since I was 12 yrs old. That was when I decided not to; drink alcohol or soda, smoke, take drugs or chew gum. I've never even had a headache. I haven't had to ever see a doctor for any flu season. Over 30 years ago, I once had a fever for about 40 minutes. I have chosen to exercise daily for most of my life. I chose jobs that paid me to exercise. I was a middle child of six and can only remember being mildly sick maybe twice all through elementary school. But the other five siblings were constantly sick either one at a time or as a group. They all took medicine and shots. My mother made an effort to try to get me sick with the others and I still didn't get illnesses. I took nothing.

When I was diagnosed with a degenerative injury, the doctor offered surgery and prescription drugs, I decided not to take the drugs and I decided not to have surgery. With the help of a physical therapist, and a lot of disciplined hard work, I made a complete recovery.

I truly know that being outside, exercising, eating nutritional food, good sleep and being happy has blessed me with wonderful health. The only vaccine I have ever had was when I was 5 yrs old and was forced by my mother. It was a traumatic moment for me. I did not feel well and could hardly sleep for about 2 weeks and my arm was sore for over a week. It was the longest and most ill I have ever been.

I really feel strongly about the position of "**my body, my choice**". Since I have chosen not to put chemicals/drugs in my body why should some one else be allowed to force me? I thought that was part of why the Nuremberg Codes were written. I majored in biology/general sciences in college so that I would better understand how to stay healthy. It is not magic, it is a priority choice. Which once again comes down to choices. We make them every day. Some good some bad. Hindsight proves I made a lot of good health decisions. NH has been my home for over 53 years, it is a very special place on earth. I hope HB 220 passes so I can choose to stay.

I pray God will give you the strength, courage and wisdom, to help all the wonderful people in NH, have the freedom to chose.

Sincerely,

Kevin Chapman

Subject: Freedom of immunization

My granddaughter spent a week at Dartmouth Hitchcock after her last D-tap vaccine. Her body was covered with fist size welts and she was paralyzed. It was discovered by a team of doctors that she is allergic to tetanus. We should all be able to make our own decisions about our health. She is now considered a "shot injury" no more needles.

Subject: The Bill concerning Medical Freedom with Immunizations

Dear Kirsten,

This bill is very important to me but I am unable to speak tomorrow morning during the senate meeting. I wanted you to know my daughter's story in case it could help pass the bill in any way. My daughter had a serious reaction to the Dtap shot when she was 2 years old. She was diagnosed with urticaria multiforme and was hospitalized for 2 days. I am in full support of any bill that can protect my daughter from getting vaccines in the future. Thank you for all you do and I will be praying for this meeting tomorrow.

Subject: Support for HB220 with Amendments

Good morning Senators,

I support HB220, which establishes medical freedom in immunizations, but I urge you to pass the bill with amendments that remove paragraphs 2 and 3 entirely.

There is no circumstance **ever** that justifies forcing people to consume pharmaceuticals. This insanity needs to be stopped and we need to get back to promoting health and fitness over reliance on synthetic drugs.

Please support HB220 and have paragraphs II & III removed.

Respectfully,

Alexandra Mennella
Hooksett

Subject: HB220 - Please OTP this bill

Hello,

Here is my testimony in support of this bill.

I appreciate you taking the time to listen to all the testimony today.

With regard to vaccination and any medical treatment, people should have a choice!

And that choice should be free from anyone being ostracized for that choice!

If I decide not to accept a medical procedure, then I should not be barred from shopping, or traveling or being otherwise ostracized from society.

People make these medical decisions very seriously and make them for good reason for themselves and their family.

Everyone says "my body, my choice" - well, people should not be shunned or punished for making a medical choice.

I hope that you pass this bill.

Subject: Support HB 220

Good afternoon,

I urge you to support H.B. 220 and protect NH citizens from discrimination for exercising their rights to refuse unwanted medical procedures, including vaccines. No government should have the right to coerce or mandate an individual's medical care, including vaccinations. Allowing government to dictate an individual's medical care in any form sets a very dangerous and worrisome precedent. This is especially true in times such as these when rash decisions are made, all government policies are dictated by a governor whose continued states of emergency effectively grant him authoritarian governance, and the public has been repeatedly misled and terrorized by a media campaign unlike any we've ever experienced.

The current Covid response in many places, NH included, has been a serious cause for concern. Evidence-based, validated scientific and public health practices have been overturned, ignored, and changed to justify Covid policies. Use of fear-based public health policy, in and of itself a violation of ethics, has resulted in much of society being too frightened to think critically and appropriately assess their personal risk from a respiratory virus that has nowhere near the lethality originally projected. Not to mention that there are multiple, effective, early treatment options and those who become ill with Covid will have full and durable immunity that cannot be improved by the vaccine.

Unfortunately, at every turn, the media and much of the government messaging has ignored, suppressed, or tried to discredit any positive news and has actively worked to perpetuate fear and maintain their iron grip on society. This pervasive panic, along with the devastating collateral damage caused by onerous and repressive government policies, has caused incredible societal harm. The current vaccines are considered "investigational" by the FDA and are only authorized by a provisional emergency use authorization. They have not undergone full testing or completed all phases of the trials, and there have been no long term studies. And this completely ignores the fact that for nearly everyone, 99.98% of us, Covid is not a serious risk and it is not known if the vaccines will prevent Covid-19 (the FDA states, "vaccine may be effective in preventing COVID-19"). As such, it is not legal to require vaccination, but I'm sure we're all very aware of the backdoor ways that vaccination status can be used a tool to force people into it if they want to travel freely, work, attend events, et cetera.

Please don't compound the error of the disastrous Covid response by further bullying and threatening people with having their rights and freedoms restricted or their lives controlled as a result of their personal health decisions. Just as the governor or public health director should not be able to dictate who is required to start taking a certain drug if a health metric is considered worrisome, or that a person has to have surgery rather than physical therapy for back pain, nor should any government official dictate vaccination and penalties for refusal.

Sincerely,
Barbara Gladders

<https://twitter.com/i/status/1382188754467745793> - This is a very short, but excellent summary of why we should never go down the path of forced medical treatment.

April 14, 2021

Senator Jeb Bradley
Chairman, Senate Committee on Health and Human Services
New Hampshire State House, Room 100
107 North Main Street
Concord, NH 03301

Senator James Gray
Vice Chairman, Senate Committee on Health and Human Services
New Hampshire State House, Room 100
107 North Main Street
Concord, NH 03301

Dear Chairman Bradley, Vice Chairman Gray, and members of the Committee,

I am writing today on behalf of the Biotechnology Innovation Organization (BIO), a national trade association for the biotechnology industry, representing over 900 companies and academic institutions involved in the research and development of innovative healthcare, agriculture, industrial, and environmental biotechnology products. BIO membership includes vaccine developers and manufacturers who have worked closely with the public health community to support policies that help ensure access to innovation and life-saving vaccines for all individuals.

BIO and our member companies would like to express our **opposition to HB 220**, which would limit the ability to implement public health requirements for vaccinations. At its worst, this would very likely reduce immunization coverage in the state of New Hampshire, possibly resulting in an increase in cases of vaccine preventable diseases – the opposite of what we should be aiming for in the midst of a pandemic.

Vaccinations are held to high regulatory standards, making them one of the most effective and safe forms of preventive medicine. Vaccinations have led to a decrease or eradication of many significant infectious diseases such as polio, measles, mumps, and rubella. They are extensively tested for safety and efficacy prior to going on the market and continue to be monitored after introduction to the public.

The choice to delay or reject some vaccines entirely is not just a personal decision. When we choose to not receive vaccines or vaccinate our children, we put ourselves and others in our community at risk for serious disease. Putting others, such as those who are immunocompromised or too young to receive vaccines, at risk for vaccine-preventable disease arguably presents a challenge to their personal freedom to go to the store, to school, or anywhere else they come into contact with their community without the possibility of contracting a dangerous, preventable illness. Eliminating consequences for individuals who opt not to vaccinate only serves to transfer the consequences of not vaccinating to the broader community.

Finally, as a secondary result of the pandemic, routine immunization rates have dropped among children, adolescents, and adults nationally.^{1,2} As we return to our pre-pandemic routines, strong immunization rates are needed to avert outbreaks of other infectious diseases such as measles, pertussis, and influenza on top of COVID-19.

BIO and our member companies appreciate the goal of increasing scientific awareness of vaccines in New Hampshire, but we oppose HB 220 because this legislation may have a negative impact vaccination coverage in the State. We stand ready to help in any discussion of alternatives as well as to share our knowledge of activities and initiatives from around the country. Please feel free to contact me with any questions that may arise.

Sincerely,

/s/

To: Jeb Bradley; James Gray; Tom Sherman; Becky Whitley; Kevin Avard; Kirsten Koch
Subject: HB220

Dear Honorable Senators Bradley, Gray, Sherman, Avard, Whitley, and Koch,

I am writing to oppose HB220.

First, please understand I strongly support freedom as it relates to bodily integrity and the various cultural, religious, and other issues of conscience that necessitate choice as it relates to medical interventions. I believe the bill as originally authored should have been supported.

That said, I am opposing HB220 because of the exemptions written into its amendments. In particular, I would like to vehemently oppose the idea that incarcerated individuals should face forced inoculation against their will just because they are incarcerated. I assert that as a society we should maintain the *minimum standard* of informed consent as it relates to medical interventions and not put the incarcerated into a special class of double jeopardy in which their incarceration results in additional unrelated consequences.

Sincerely,
Dr. Hridaya Sivalingam, PhD, NCC, LCMHC

Subject: In opposition to HB 220

According to the New Hampshire government website, HB 220 is currently before the Senate's Health and Human Services Committee. I am writing in opposition to this bill.

It claims to be about "establishing medical freedom in immunizations," but this is misleading. The bill says (part III): "Employers may only mandate medical treatment or immunization as a condition of employment when a direct threat exists as defined in 29 CFR 1630.2(r)."

Employers have the right to set reasonable requirements for safeguarding their employees' safety. Walk into the restroom of any fast food restaurant, and you'll see that employees are required to wash their hands. This isn't an infringement of their rights. Dictating that employers may not set safety requirements is an infringement of the employer's rights.

When employees are working with vulnerable people, such as residents in nursing homes and patients in hospitals, a requirement that employees present the least possible risk is not just reasonable but morally necessary. No one has the God-given right to be given a job in such a situation and be exempted from conditions to protect the people they work with.

While I don't fully understand the "direct threat" case, it appears highly limited. It has to be applied on an individualized basis. Where it applies, immunization would seem to be too late (e.g., a person showing up for work with COVID).

HB 220 is NOT ABOUT FREEDOM. It's about legislators imposing their standards on private businesses, and it would interfere with the protection of employees' health. I urge rejection of this bill. Thank you for taking the time to read this.

Subject: BIA Opposes HB 220 - Medical Freedom in Immunizations

Importance: High

Dear Members of the Senate Health and Human Services Committee: I am writing to you to urge that you find HB 220, establishing medical freedom in immunizations, inexpedient to legislate. This would be bad legislation under any circumstances but is particularly dangerous in the midst of a pandemic. BIA is specifically opposed to sections of the bill prohibiting private sector employers from establishing workplace policies relating to vaccinations. Employers are held to the highest health and safety standards in their workplaces. For many employers, especially those in the medical and health care sector, not only do they have an obligation to protect their employees, they also have an important responsibility for the care of their patients, especially those who are already medically compromised.

Passing this legislation will only serve to prolong the pandemic in New Hampshire. It will lead to unsafe, potentially unhealthy working conditions for our employees and will delay our efforts to reopen the state's economy. I urge you to vote against HB 220.

Sincerely,

Dave Juvet

Subject: Vaccine passports

Good Morning, my name is Cristin Fellows and I am a resident of Manchester, NH. I am writing to you today to share my grievances on the proposal for a vaccine passport. I am opposed and this is why:

If I had a food allergy, the government would not step in (hopefully) and force me to eat the food that would give me an anaphylactic response. I see this vaccine in the same manner. We have enough data now showing people are having severe adverse reactions to every single one of these experimental "vaccines"! Many have already passed away when they didn't need to. WE HAVE EARLY THERAPEUTICS THAT WORK! And that last line alone should null and void concerns for restricting citizens movement.

The CDC had the PCR test, which is authorized for emergency use, ramped up to 40 amplified cycles before the Biden regime took office. Anything over 28 cycles will pick up dead or alive virus detection causing false positives.

The CDC once again is reclassifying positive cases on May 14th which means vaccinated positive cases will no longer be counted unless hospitalized or death. This is coming at time when fully vaccinated people are making up a good chunk of the positive cases. The CDC also used asymptomatic fear as a way to dictate why we should be locked down for over a year. Now that the vaccines are out the CDC is no longer concerned with asymptomatic spread. This is another tactic to hide the harm of a rushed experimental vaccine, to drop those cases, have a rise in unvaccinated cases and blame it on those people.

I will not play Russian roulette with my health or my families and lower our chances of survival to please a tyrannical government or the people who eat up the fear mongering propaganda.

We have early therapeutics that work.

Thank you for your time.

Subject: House Bill 220 is wrong for NH

I am writing to urge you to vote House Bill 220 Inexpedient to Legislate. Vaccine passports encourage vaccination and high vaccination rates protect everyone. We must encourage everyone to get vaccinated in order to protect those that cannot be vaccinated for medical reasons.

If this bill becomes law, a person who refuses to be vaccinated against ANY dangerous disease could not be refused entry to a public space and would therefore be free to spread disease anywhere they go – without any regard for public health.

Proof of vaccination is currently required for students to attend public school and for travelers to visit other countries. A driver's license is required to drive on public roads. A cosmetology license is required to be on display in a salon – all to protect the general public.

The Covid-19 vaccine will be approved by the FDA soon and proof of vaccination will allow our state's economy to return to normal sooner rather than later.

Subject: HB 220 - lacks exception for probate mental health commitments?
Attachments: HB 220 Establishing medical freedom in immunization....docx

Hello Senators,

I am not a lawyer, but as I testified to at the hearing, I believe the bill as currently written/amended does not contain an exception for non emergent (probate) commitments as described in RSA 135c 34-54. I think this would mean no one could be held for longer than 10 days? I did suggest alternative language in my testimony. Hoping someone can correct this on the floor or at least get a legal opinion/interpretation

Thanks for your consideration of this. Have a great weekend!
