200 Flood Control; Reimbursement to Cities and Towns. Amend RSA 122:4 to read as follows:
122:4 Reimbursement to Cities and Towns.

I. On a date not later than 30 days following the establishment and approval of tax rates for each city and town affected by and subject to the provisions of this chapter, the state treasurer shall pay to each town and city in which any taxable real estate or interest therein has been acquired under this chapter by the United States and thus become tax exempt for such year, a sum equal to the taxes which would have been assessed against the real estate or interest therein in such town or city if the same had been included in the list of taxable property as proposed by the commissioner of revenue administration in RSA 122:6. For land acquired by the United States under this chapter, reimbursement shall be made upon a valuation determined as provided herein on a permanently continuing basis, and if growing wood and timber was taxable as real estate on the date of acquisition by the United States of the land on which it stood, it shall be deemed to be land hereunder. For all artificial improvements on land acquired by the United States under this chapter, including buildings, structures and other artificial real estate fixtures of any kind, reimbursement shall be made upon a valuation determined initially as provided herein and thereafter annually reduced by 2-1/2 percent so that at the end of 40 years reimbursement therefor shall have terminated. On land and improvements thereon acquired by the United States under this chapter the initial assessed valuation of the land and improvements for purposes of reimbursement shall be the locally assessed valuation thereon for the tax year in which acquired as adjusted by the assessors and the commissioner of revenue administration acting as a joint board, so as to make such valuation proportional to the value of all other property in such town or city subject to taxation. For purposes of this section the joint board may subdivide such assessment equitably between land and improvements thereon or between real estate acquired and that not acquired, if the official assessment was not thus subdivided. The valuations of improvements thus determined shall thereafter be annually reduced over a 40-year period as above provided. On land, and artificial improvements, the valuations initially established as above provided in a town or city shall be reviewed by the commissioner at least once in every 5 years and more frequently if reasonably necessary and be changed as necessary to make them proportional with the assessed value of all other taxable property in such town or city. The amount of the reimbursement due to each town and city hereunder shall be determined by the commissioner and certified by it to the state treasurer not later than 30 days following the establishment and approval of the tax rates of each town and city under this chapter. The commissioner shall reduce the amount of reimbursement thus determined by any amount paid or due that town or city for that year by or from the United States, another state, an interstate flood control agency or other source, because of such loss of taxable valuation. The governor is authorized to draw ~~his~~ **a** warrant for the payment of such reimbursements out of any money in the treasury not otherwise appropriated. Provided, however, that reimbursement payments for loss of taxes on account of the acquisition of railroad or public utility property shall be

9 V.(a) Within 30 days of receipt of an application for a permit or ~~[75]~~ **30** days of receipt of an
10 application for a permit that will require a ~~[variance of the minimum standard of RSA 483-B:9, V or~~
11 ~~a]~~ waiver of the minimum standards of RSA 483-B:9, the department shall request any additional
12 information **reasonably** required to complete its evaluation of the application, and provide the
13 applicant with any written technical comments the department deems necessary. Any request for
14 additional information shall specify that the applicant submit such information as soon as
15 practicable and notify the applicant that if all of the requested information is not received within
16 ~~[60]~~ **120** days of the request, the department shall deny the application.

33 **department shall issue a written notice to the property owner or agent stating that the**
34 **notification has either been accepted or rejected. If the department does not respond**
35 **within the 5-day period, the property owner or agent may submit to the department a**
36 **written request for a response. A request submitted electronically by the applicant shall**
37 **constitute a written request provided that the applicant has previously agreed to accept**

electronic communication. If the department fails to respond to the written request within an additional 5 days the property owner or agent shall be deemed to have a permit by notification and may proceed with the project as presented in the notification filing. The authorization provided by this subparagraph shall not relieve the applicant of complying with all requirements applicable to the project, including but not limited to requirements established in or under this chapter and RSA 485-A relative to water quality.

~~[(d)]~~ (e)(1) The time limits prescribed by this paragraph shall supersede any time limits provided in any other provision of law. If the department fails to act within the applicable time frame established in subparagraphs (b) and (c), the applicant may ask the department to issue the permit by submitting a written request. If the applicant has previously agreed to accept communications from the department by electronic means, a request submitted electronically by the applicant shall constitute a written request.

(2) Within 14 days of the date of receipt of a written request from the applicant to issue the permit, the department shall:

(A) Approve the application, in whole or in part, and issue a permit; or

(B) Deny the application and issue written findings in support of the denial.

(3) If the department does not issue either a permit or a written denial within the 14-day period, the applicant shall be deemed to have a permit by default and may proceed with the project as presented in the application. The authorization provided by this subparagraph shall not relieve the applicant of complying with all requirements applicable to the project, including but not limited to requirements established in or under this chapter and RSA 485-A relating to water quality.

(4) Upon receipt of a written request from an applicant, the department shall issue written confirmation that the applicant has a permit by default pursuant to subparagraph ~~[(d)]~~ (e)(3), which authorizes the applicant to proceed with the project as presented in the application and requires the work to comply with all requirements applicable to the project, including but not limited to requirements established in or under this chapter and RSA 485-A relating to water quality.

~~[(e)]~~ (f) All applications filed in accordance with the rules adopted by the department under RSA 483-B:17 and which meet the minimum standards of this chapter shall be approved and a permit shall be issued.

~~[(f)]~~ (g) The department may extend the time for rendering a decision under subparagraphs (b)(3) and (c)(3), without the applicant's agreement, on an application from an applicant who previously has been determined, after the exhaustion of available appellate remedies, to have failed to comply with this chapter or any rule adopted or permit or approval issued under this chapter, or to have misrepresented any material fact made in connection with any activity regulated or prohibited by this chapter, pursuant to an action initiated under RSA 483-B:18. The length of such an extension shall be no longer than reasonably necessary to complete the review of

Amendment to HB 2-FN-A-LOCAL

the application, and shall not exceed 30 days unless the applicant agrees to a longer extension. The department shall notify the applicant of the length of the extension.

~~[(g)]~~ **(h)** The department may suspend review of an application for a proposed project on a property with respect to which the department has commenced an enforcement action against the applicant for any violation of this chapter, RSA 482-A, RSA 485-A:17, or RSA 485-A:29-44, or of any rule adopted or permit or approval issued pursuant to this chapter, RSA 482-A, RSA 485-A:17, or RSA 485-A:29-44. Any such suspension shall expire upon conclusion of the enforcement action and completion of any remedial actions the department may require to address the violation; provided, however, that the department may resume its review of the application sooner if doing so will facilitate resolution of the violation. The department shall resume its review of the application at the point the review was suspended, except that the department may extend any of the time limits under this paragraph and its rules up to a total of 30 days for all such extensions. For purposes of this subparagraph, "enforcement action" means an action initiated under RSA 482-A:13, RSA 482-A:14, RSA 482-A:14-b, RSA 483-B:18, RSA 485-A:22, RSA 485-A:42, or RSA 485-A:43.

367 Minimum Shoreland Protection Standards. Amend RSA 483-B:9, II(d) to read as follows:

(d) No fertilizer, except limestone, shall be applied to vegetation or soils located within 25 feet of the reference line of any public water. ***Beyond 25 feet,*** ~~[low phosphate, slow release nitrogen fertilizer or limestone,]~~ ***slow or controlled release fertilizer, as defined by rules adopted by department,*** may be used ~~[on areas beyond 25 feet from the reference line].~~

368 Minimum Shoreland Protection Standards. RSA 483-B:9, V(a) through V(b)(2)(A)(ii) is repealed and reenacted to read as follows:

(a) Maintenance of a Waterfront Buffer.

(1) The waterfront buffer shall be those protected shorelands within 50 feet of the reference line. The purpose of this buffer shall be to protect the quality of public waters while allowing homeowner discretion with regard to water access, safety, viewscape maintenance, and lot design.

(2) Within the waterfront buffer all of the following prohibitions and limitations shall apply:

(A) No chemicals, including pesticides or herbicides of any kind shall be applied to ground, turf, or established vegetation except if applied by horticultural professionals who have a pesticide application license issued by the department of agriculture or as allowed under special permit issued by the division of pesticide control under rules adopted by the pesticide control board under RSA 541-A, or fertilizers of any kind except those specified in RSA 483-B:9, II(d).

(B) Rocks and stumps and their root systems shall be left intact in the ground unless removal is specifically approved by the department, pursuant to RSA 482-A or RSA 483-B:11, II or unless rocks are removed to improve runoff control or the planting in the waterfront buffer, and stumps that are removed are replaced with pervious surfaces, new trees, or other woody vegetation.

Amendment to HB 2-FN-A-LOCAL
- Page 107 -

(C) No natural ground cover shall be removed except as necessary for a foot path to water and access ways as provided under RSA 483-B:9, V(a)(2)(D), **(viii) and** (ix), for normal maintenance, to protect the waterfront buffer, cutting those portions that have grown over 3 feet in height for the purpose of providing a view, to provide access to natural areas or shoreline, or as specifically approved by the department, pursuant to RSA 482-A or RSA 483-B.

(D) Starting from the northerly or easterly boundary of the property, and working along the shoreline, the waterfront buffer shall be divided into 50 by 50 foot segments. Owners of land within the waterfront buffer shall measure, calculate, and maintain the tree, sapling, shrub, and groundcover point score in each of these segments in accordance with the methods and standards described in subparagraphs (i) through (ix).

(i) Tree and sapling diameters shall be measured at 4 1/2 feet above the ground for existing trees and saplings, or by caliper at a height consistent with established nursery industry standards when nursery stock is to be used, and are scored as follows:

Diameter or Caliper Score

1 to 3 inches – 1

3 to 6 inches – 5

6 to 12 inches –10

12 to 24 inches –15

Greater than 24 inches- 25

(ii) Shrubs and groundcover plants shall be scored as follows:

Four square feet of shrub area – 1 point.

Ground cover planted in the form of sod or mat – one point for every 50 square feet.

Shrub and groundcover shall not count for more than 25 points in each full segment.

(iii) Dead, diseased, or unsafe trees or saplings shall not be included in scoring.

(iv) If the total tree and sapling score in any 50 foot by 50 foot segment exceeds 50 points, then trees, saplings, and shrubs over 3 feet in height may be removed as long as the sum of the scores for the remaining trees and saplings in that segment does not total less than 50 points. If for any reason there is insufficient area for a full segment, or the segment contains areas incapable of supporting trees and saplings, such as areas of rock, ledge, or beaches, the point score requirement for the remaining vegetation in that partial segment shall be reduced proportionally to that required of a full segment. Vegetation shall not be removed from any segment which fails to meet the minimum point score for that segment. Owners are encouraged to take efforts to plan the maintenance of their waterfront buffer areas including the planting of additional non-invasive vegetation to increase point scores within segments, thus providing sufficient points to allow the future removal of vegetation as may become necessary while still meeting the requirements of this paragraph.

Amendment to HB 2-FN-A-LOCAL
- Page 108 -

(v) The department shall approve applications pursuant to RSA 482-A or RSA 483-B that include the planting of trees, saplings, shrubs, and groundcover as necessary to at least maintain either the existing point score or the minimum score required. The department shall not approve any application that would result in a combined vegetation score of less than the minimum score required where the segment initially meets the minimum score or would result in any reduction of the point score where the segment does not initially meet the minimum score.

(vi) Owners of lots and holders of easements on lots that were legally developed prior to July 1, 2008 may maintain but not enlarge cleared areas, including but not limited to existing lawns, gardens, landscaped areas, beaches, and rights-of-way for public utilities, public transportation, and public access, and may repair existing utility structures within the waterfront buffer. Conversion to or planting of cleared areas with non-invasive species of ground cover, shrubs, saplings, and trees is encouraged but shall not be required unless it is necessary to meet the requirements of subparagraph (g)(2) or (g)(3), or RSA 483-B:11, II.

(vii) Normal trimming, pruning, and thinning of branches to the extent necessary to maintain the health of the planted area as well to protect structures, maintain clearances, and provide views is permitted provided such activity does not endanger the health of the plant.

(viii) When necessary for the completion of construction activities permitted in accordance with RSA 483-B:6, a temporary 12 foot wide access path shall be allowed. On those properties accessible only by water, this access path may be maintained provided it is stabilized with a surface that will infiltrate stormwater. On other properties the access path shall be completely restored and replanted with vegetation upon completion of construction except as allowed under subparagraph (ix).

(ix) A permanent 6-foot wide foot path as well as access to any docks, beaches, structures, existing open areas, and the water body, configured in a manner that will not concentrate storm water runoff or contribute to erosion, are allowed.

(b) Maintenance of a Natural Woodland Buffer.

(1) A natural woodland buffer shall be maintained within 150 feet of the reference line. The first 50 feet of this buffer is designated the waterfront buffer and is subject to the additional requirements of subparagraph (a). The purpose of the natural woodland buffer shall be to protect the quality of public waters by minimizing erosion, preventing siltation and turbidity, stabilizing soils, preventing excess nutrient and chemical pollution, maintaining natural water temperatures, maintaining a healthy tree canopy and understory, preserving fish and wildlife habitat, and respecting the overall natural condition of the protected shoreland.

(2) Within the natural woodland buffer of a given lot the vegetation, except lawn, within at least 25 percent of the area outside the waterfront buffer shall be maintained unaltered or improved with additional vegetation. Owners of lots legally developed or landscaped prior to July 1,

Amendment to HB 2-FN-A-LOCAL
- Page 109 -

2008 that do not comply with this standard are encouraged to, but shall not be required to, increase the percentage of area to be maintained in an unaltered state. The percentage of area maintained in an unaltered state on nonconforming lots shall not be decreased.

369 Impervious Surfaces. Amend RSA 483-B:9, V(g) to read as follows:

(g) Impervious surfaces.

(1) ~~[Subject to subparagraph (2),]~~ No more than 30 percent of the area of a lot located within the protected shoreland shall be composed of impervious surfaces, ***unless a stormwater management system designed and certified by a professional engineer that will not concentrate stormwater runoff or contribute to erosion is implemented.***

(2) If the impervious surface area will exceed 20 percent, ***but is less than 30 percent,*** a stormwater management system shall be implemented and maintained which is designed to infiltrate increased stormwater from development occurring after the effective date of this paragraph in accordance with rules established by the department under RSA 485-A:17.

(3) If the impervious surface area will exceed ~~[20]~~ **30** percent and the ~~[natural]~~ tree, ~~[and]~~ sapling ~~[cover]~~, ***shrub, and groundcover*** in the waterfront buffer does not meet the ~~[50-point minimum]~~ ***point*** score ***requirement*** of RSA 483-B:9, V(a)(2)(D) in any segment, then such segment shall be planted, as determined by rule of the department, with [native] trees, saplings, ***shrubs***, or ~~[natural ground cover]~~ ***groundcover*** in sufficient quantity, type, and location either to meet the minimum score or to provide at least an equivalent level of protection as provided by the minimum score and shall be maintained in accordance with RSA 483-B:9, V(a).
