Sen. White statement regarding the Secretary of State's report on the Local Government Center (LGC)

(Concord) Sen. Ray White (R-Bedford), Vice Chair of the Commerce Committee, released the following statement today regarding the report by the Secretary of State that raises concerns about the Local Government Center's (LGC) insurance programs:

"The Senate has been consulting with the Office of Secretary of State for months on these issues concerning the LGC. Whenever public funds are involved, we are concerned that they are being managed in a lawful and responsible manner as required by the fiduciary duty of those entrusted. We are giving Secretary Gardner's report a full review and look forward to implementing solutions that will serve the public's interest. We welcome recommendations found in the report as well as input from others."
