

Special Committee Members on Redistricting -

I have examined the following proposed districts. Changes like these are subjective, so long as they are IAW law. I support the redistricting maps passed by the House in their current form. I find nothing untoward about the choices made.

HB 50 - State Representative districts
HB 51 - State Senate districts
HB 52 - Congressional districts
HB 53 - Executive Council districts
HB 54 - County Commissioner districts
HB 55 - Delegates to state party conventions

The House's Congressional map keeps cooperative shared Police and Fire Departments, shared water and sewers systems, and regional planning areas together. These are services that rely heavily on federal funds and rely on the economy of mutuality.

The House maps do the job of representing New Hampshire citizen population as well as any other. There is no point in quibbling over minute preferences. I feel it is time to finish the process and move on.

Please find the proposed maps acceptable as introduced.

Daniel Richardson, Nashua
